

ABSTRACT OF THE DISCLOSURE

5 A method of changing a fragment size of
data packets in a router where a data packet is
divided into the data packets having the fragment
size, and are transmitted to a network along with
audio packets includes the steps of acquiring, in
the router, a parameter indicative of whether proper
audio quality is maintained through transmission of
the audio packets, and changing the fragment size of
10 the data packets in response to the acquired
parameter.
